

## **CREATE AND CONFIGURE IBM CLOUD SERVICES**

### **Create NODE-RED Service**

Team ID : PNT2022TMID 04593

Project Name Project - Smart Waste Management System For Metropolitan City

Step 1: Login into IBM CLOUD account

Step2: In catalog, search for node red application

Step 3: Enter the project details and click on create

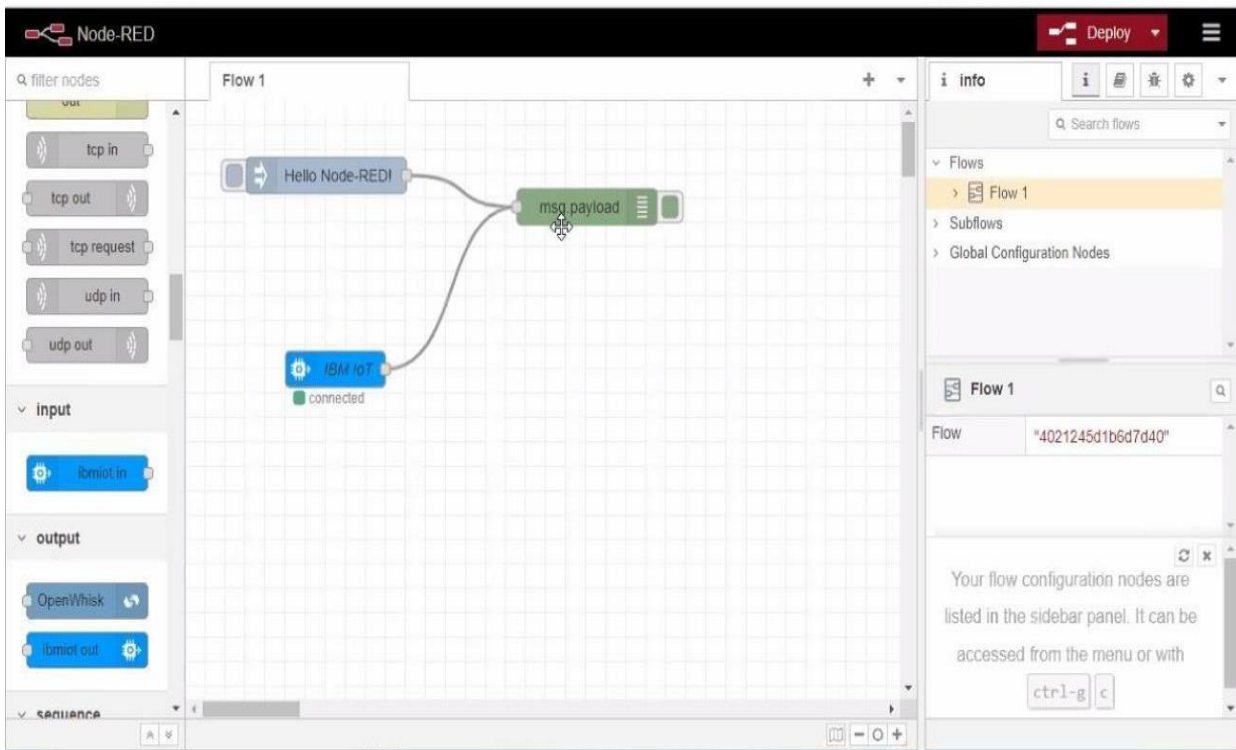

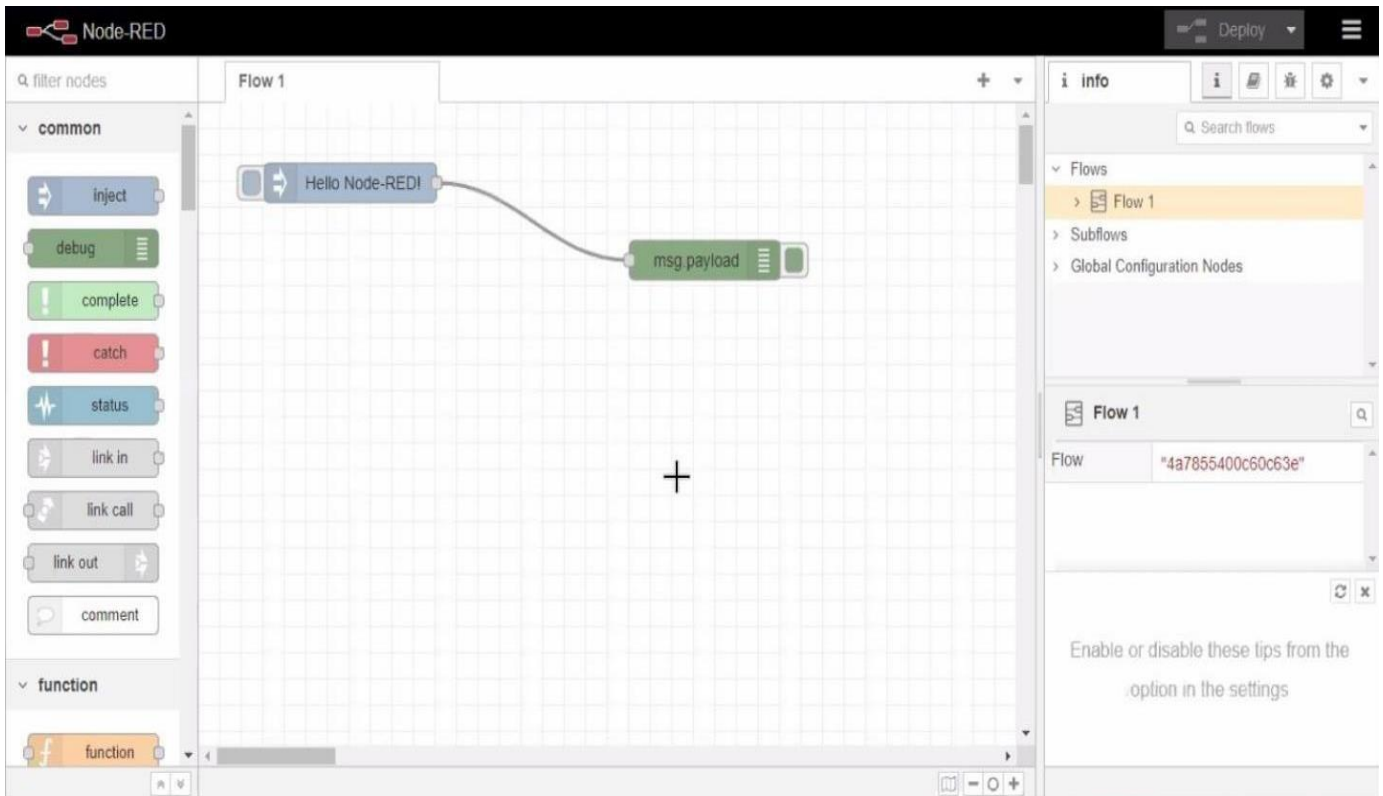

Step 4: click on deploy option and deploy

Step 5: set up the environment for deploying and create

Step 6: Now drag and drop the nodes and connect nodes with ibm Watson platform

Step 7: Set up the settings that connects node red service with Watson iot

Step 8: Finally output can be seen in node red service

Node-RED interface showing a flow named "testing\_flow". The flow contains two nodes: "my\_inject\_node" and "Output\_node". The left sidebar shows the "common" and "function" node categories. The right sidebar shows the configuration panel for the selected flow. The browser address bar shows the URL: `node-red-uzhqs-2022-10-08.au-syd.mybluemix.net/red/#flow/4a7855400c60c63e`. The system tray shows the time as 2:33 AM on 10/16/2022.

Node-RED interface showing the "Edit debug node" dialog box. The dialog box is open for the "Output\_node" and shows the following settings:

- Output: `msg.payload`
- To: ☒ debug window, ☐ system console, ☐ node status (32 characters)
- Name: `Output_node`

The "Enabled" checkbox is checked. The background shows the "testing\_flow" with the "my\_inject\_node" and "complete: 1" nodes. The system tray shows the time as 2:37 AM on 10/16/2022.
